Exercise 6:

Calculate the correlation between Y and X_1. How different is it from 1.2?

The correlation is 0.2162859, which is quite different from 1.2, but the coefficient is 1.19650, which is quite close to 1.2.

The outcome of the regression of Y on X where X = (1, X_1, X_2, X_3) and the coefficients on this regression:
